ID 212699409 ⚡ Israel ↗[Github](#)

SUMMARY

Motivated software engineering student with a solid foundation in programming and problem-solving. Currently developing projects and skills focused on AI and machine learning as I work toward becoming an AI engineer. Eager to contribute creativity, fast learning, and strong technical growth to innovative teams.

PROJECTS

Automated Parking Management System (Java Full-Stack)

⌚ 03/2025 – 08/2025 📍 Karmiel, Israel ↗[GitHub Repo](#)

- Designed and developed a full-stack Java application using Eclipse IDE to automate parking operations.
- Built features including vehicle check-in/check-out, subscription management, reservation system, and report generation.
- Built features including vehicle check-in/check-out, subscription management, reservation system, and report generation.
- Applied Agile (SCRUM) methodologies and software engineering best practices to ensure efficient development and team collaboration.

Dynamic Website Development

⌚ 01/2024 - 03/2024 📍 Karmiel, Israel

- Designed and built two interactive, responsive websites using HTML, CSS, and JavaScript.
- Prioritized user experience by optimizing layout, navigation, and cross-device functionality.
- Applied front-end best practices to ensure performance, accessibility, and visual consistency.

ADDITIONAL SKILLS

Professional & Interpersonal Skills:

- Problem-solving, communication, teamwork, collaboration
- Strong ability and passion for self-learning.
- Time management, attention to detail, quick learner, self-motivated
